

Seasonal Magnets

Add texture to unexpected places.

What you'll need

- ½-inch diameter magnetic buttons (available at craft stores)
- Small glue gun or old-fashioned tacky glue
- Bright (not too dry) leaves, seedpods and acorns

How to make it

1. Place a small dot of glue onto the back of a leaf, seedpod or acorn and press a magnet gently into the glue. Let it dry on a flat surface, with the magnet facing up, for 5 to 10 minutes.
2. Use the magnets to bring a touch of the season to metal surfaces like the fridge, a storage bin or a filing cabinet. And get your kids and their friends involved; they'll love the results.
