Stick-to-it Board

This gift is easy to put together but requires a drill to make it hangable.

"What you'll need

- 24-by-36-in. magnetic sheet metal (available at home improvement stores)
- Narrow chain, about 45-in. long
- Power drill
- Small tools, knobs, hinges and hooks for magnet tops
- Magnet discs
- 2 S-hooks or binder rings for hanging the chain
- Low-temp hot glue gun and glue sticks, or other strong glue

How to make it

- 1. For the board, drill 2 holes at the top corners of the sheet metal for hanging.
- 2. Thread 1 S-hook or binder ring through each hole, and then attach the end links of the narrow chain to the S-hooks or rings.
- 3. For the magnets, glue the small tools, knobs and odds and ends to the magnet discs and let dry.
- 4. Hang some pieces of handmade art on it with the magnets to give him something to admire while he's working.
- 5. Now it's ready for Dad to use as a project board. Stick to it, Dad!
