

Sebastian the Bat

Crafter level: Easy

What you'll need

- Printout of bat template
- Stapler
- Black card stock
- Scissors
- Small hole punch
- Necklace or string

How to make it

1. For the necklace, staple the bat necklace template to a piece of black card stock. Make sure you staple the paper to the card stock outside of the bat's cutting lines. (This will keep the paper from moving around while you cut out the bat.)
2. Cut around the outside solid lines of the bat through the paper and card stock.
3. Leaving the paper on top of the card stock bat, use the fold lines indicated on the paper to score and fold the bat's wings and body.
4. Punch small holes into the card stock where indicated on the paper template. Then string him onto your necklace or string.
