# Happy Wedding, Happy Life

**Crafter level:** Easy

## What you'll need

- "Happy Wedding" printable
- 1 sheet card stock
- 2 long, narrow wooden knitting needles, painted cream
- Hot glue gun and glue sticks
- Craft knife and cutting mat

## How to make it

1. Print out the "Happy Wedding" banner printable onto card stock and cut out. Carefully make small slits where indicated with the craft knife.
2. Insert the tip of 1 knitting needle through slit in the top "Happy" banner so that the needle is at the back of the banner.
3. Insert the tip of the second needle into the bottom "Wedding" banner so that the needle is at the back of the banner. Slide it down about 6 inches so the 2 banners, when stacked, won't overlap.
4. Place the banners with needles facing down and line up. Secure the backs of both banners to both needles with glue and let dry.
5. Clean the points of both needles with soap and water carefully, so as not to get the banners wet, before inserting them into the cake. Insert both needles into the cake at the same time.
