

1. Print out the mask on to card stock weight paper.
2. Cut along the outside dashed lines.
3. Carefully cut along the inside dashed lines for the eye openings. If eye openings don't match your face, cut them larger so you can see better.
4. Use a hole punch to make the side holes for adding string or elastic.
5. Cut a piece of string or elastic long enough to fit comfortably around the back of your head plus several inches.
6. Tie ends of the string or elastic to both side holes of the mask so that it fits comfortably. Adjust the tied ends of the string or elastic if you need to.
7. Put mask on and have fun!
